(54) Title: MOBILE COMMUNICATION DEVICE HAVING MUSIC PLAYER NAVIGATION FUNCTION AND METHOD OF OPERATION THEREOF

(57) **Abstract:** The invention relates to a controlling arrangement for a music player application in a mobile communication device. To improve the control of the music player, a multifunctional soft button (100) with four switching positions (up, down, left and right) and a mode switching arrangement (110) are provided on the keyboard layout (10). The application can be switched in two different modes with the switching arrangement and can be controlled with the multifunctional soft button, the latter having different functionality depending on the mode of the application. Combined functionality of the multifunctional soft button from the first and second mode is also possible. Additional symbols related to the music player functionality are printed in different colors on the multifunctional soft switch.
